PROFIL

Experienced Front-end developer with more than three years of experience in developing interactive and responsive web applications. I am passionate about using modern technologies like HTML, CSS, JavaScript (ES6), PHP and MySQL to create visually appealing and user-oriented solutions. I have worked on numerous independent projects, where I have developed creative and functional approaches in accordance with the specific needs of clients.

WORK EXPERIENCE

Fullstack Web developer - lecturer

- Successfully educated more than 40 participants at the beginner and intermediate level through interactive FullStack web programming courses.
- Developed and implemented a complete course structure, including lesson plans, knowledge tests and practical exercises, with a special focus on the development of real applications.
- Each course included work on 3 real-world projects, including a mini social network (PHP & MySQL), a blog application, and a to-do list with JavaScript validation.
- With mentoring and an individual approach, a course completion rate of 95% was achieved, while over 60% of participants continued their training or found freelance projects.

Frontend developer - freelance projects

2021- 2022

Freelance

- Independently developed 5 applications for international clients using modern technologies such as JavaScript (ES6), PHP, Laravel and React using Bootstrap and Tailwind.
- E-commerce application - development of a custom basket for customers, filters by category, product validation. The client saw up to 40% longer user retention after implementation.
- Blog (CMS) application - enabled adding, deleting and editing articles, registration, user login and admin dashboard.
- All projects are optimized for performance and SEO, with average load times under 2 seconds

Wordpress developer - YouTestMe

2020-2021

Developed and maintained WordPress sites using custom themes, plugins and page builders (Elementor, WPBakery). Optimized site performance, resolved security challenges and implemented SEO strategies
